

New Activity - The Creative Challenge

- **The 15-Foot Photo**

- At home, stand in the center of any room in your house. Look for photographic subjects that happen to be within 15 feet of where you are standing. You may have to really open your mind to the possibilities. Think about the available light and the light that is needed to best show the subject, as well as the lens length, exposure, and composition. You will be amazed how many objects you see daily can actually be quite impressive in a photo.
- Select one image and send it to Randy Hatcher (randyhat@gmail.com) by June 14 to be included in a slideshow during our June 21 meeting. Please limit your image to one you've taken for this first "CREATIVE CHALLENGE".
